

INSTALLATION INSTRUCTIONS

Height Adjusters

General Information

Please read these instructions carefully and keep them in a safe place for future reference. These instructions must be followed carefully to ensure proper operation.

The modular water detection probe has been specifically designed for use with TraceTek and AquiTron™ leak detection systems.

The modular Probe is designed for use in ordinary areas with temperatures of 0°C to 50°C (32°F to 122°F).

NOTE: Adjust sensor tip height to suit the application and surrounding environment.

Tools required

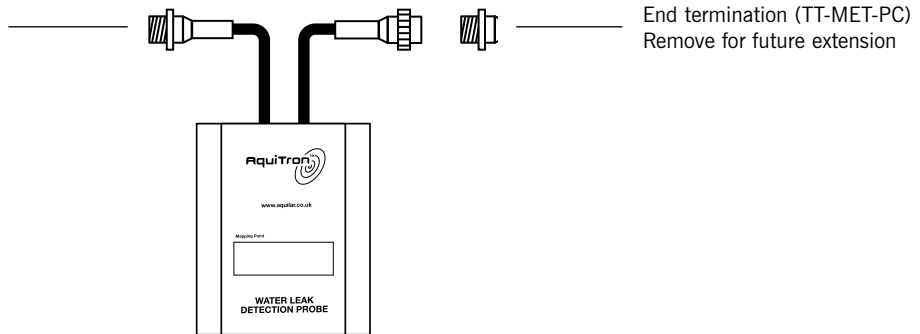

Phillips (cross-head) screwdriver
Small flat-head screwdriver

Zones / Regions

Probes with terminal strips and built in resistors [weighted lengths] equal to 8 mtrs (25 feet) for the first probe and 16 mtrs (50 feet) for each subsequent probe when used on the TraceTek TTDM-PLUS or TTSIM-1/1A alarm & locator panel. If probes are used alone on a circuit without sensing cable the “zones” setting can be used on the panels.

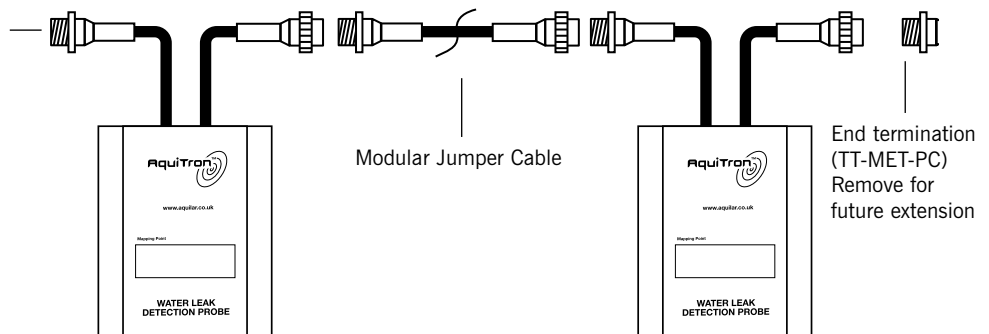

Single probe

Connect to TraceTek / AquiTron™ Leak detection Panel via a leader cable (TT-MLC-PC) or combination of modular leader cable and modular jumper cable

Multiple probes

Connect to TraceTek / AquiTron™ Leak detection Panel via a leader cable (TT-MLC-PC) or combination of modular leader cable and modular jumper cable
