

The Aquitrone™ AT-RBU provides a visual and audible alarm together with two sets of SPDT relay alarm contacts for use with any TraceTek / Aquitrone™ controller that has a set of change over relays contacts.

The AT-RBU is provided in the same style of enclosure as the TTSIM-1A/2 system interface units and can be housed in one case next to the TTSIM.

The AT-RBU replicates the relay contacts from the TraceTek or Aquitrone™ range of controllers

The unit operates on either 230Vac or 24Vac.

Connection to TraceTek and Aquitrone™ panels is through three link cables (NC, COM and NO).

Important: All information, including illustrations, is believed to be reliable. Users, however, should independently evaluate the suitability of each product for their application.
