

Liquid Hydrocarbon Fuel Oil Leak Detection

TraceTek TT-FFS

Product: TraceTek TT-FFS

Application: Fast Fuel Sensors installed within an earth bund to detect overfills, leaks from flanges and side connections and drain line leaks

Site: UK

TT-FFS-100-3-L attached to the base of a post within the bunded area around the base of the tanks. Exe junction box housing terminals for the connection of the FFS sensor.

- 1) 4 x TTC-1 controller with MTL 7767+ Zener barriers.
- 2) wired to junction boxes with branch connectors local to the tanks proving a centralised monitoring system.
