leak detection solutions

CubicSecure

Did you know that some insurance companies offer lower premiums by having a leak detection water shut-off valve fitted

Water Grip

More than 30% of damage to homes are water-related. Leaks can go unnoticed for weeks or even months, causing mold, structural damage and costly repairs – often before any visible signs appear

Quandify smart and automatic water shut-off

Prevent water damage, avoid insurance claims

Peace of mind with instant leak alerts

Water monitoring and leak detection

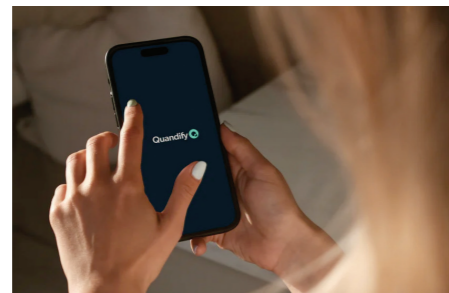

Detects even the smallest of leaks and turns water off immediately

- Detects multiple leak types
- Integrated water shut-off valve
- Remote monitoring via app with push notification
- Monitors pressure and temperature

Prevent water damage and detect leaks

In Quandify's app, you can monitor your water use and track your consumption, detect water leaks and shut the water off. The app gives you remote control over your home's water safety. Smart and simple, the ultimate way to stay safe from water damage.

Remote monitoring and control with instant alerts

- Monitor and control everything straight from your smartphone
- Leak and micro-leakage detection
- Manual override
- Plug-and-play installation
- Wireless connectivity

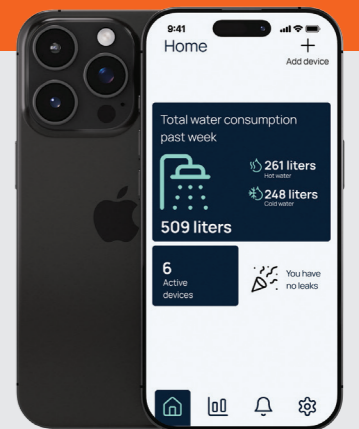

Innovative, ultrasonic technology

The Water Grip is an innovative, non-invasive water meter designed to provide comprehensive monitoring of water systems, playing a vital role in Legionella prevention. Its ultrasonic technology offers high-accuracy flow and temperature readings while requiring no plumbing expertise for installation.

Easy installation and long battery life

- Easy installation – simply clamps onto existing pipes
- No plumber or pipe cutting required
- The market's easiest installation process
- Fits multiple pipe types and sizes
- Install two together to monitor hot and cold water supplies
- Battery and USB-C powered (up to 3-year battery life)
- Remote monitoring via app with push notification

Stay in control, wherever you are

Track your water consumption, get instant leak alerts and monitor temperature directly from your phone. The Quandify app gives you peace of mind and helps you save money, no matter where you are.

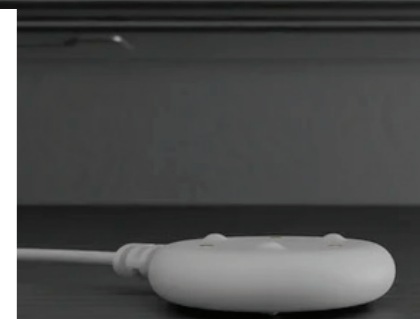

CubicDetector

Water leak sensor for every part of your property

The wireless water leak sensor can be placed anywhere in your property to prevent water leaks causing extensive water damage. Up to 3 years battery life.

The CubicDetector sounds an alarm and notifies you in the app as soon as it is in direct contact with water.

CubicDetector can be paired with both CubicSecure for automatic water shut-off for advanced leak protection or with Water Grip for leak monitoring and notification. CubicDetector can also be used as stand alone sensors for ultimate monitoring.

Why water monitoring matters

Undetected leaks can lead to expensive repair costs

Real-time monitoring

Upgrade your property with Quandify's solutions to know exactly how much water you use, down to the litre

Instant leak detection

Find small, large and hidden leaks before they become expensive problems

Smart alerts and remote control

Get notified and take action from anywhere in the world with the Quandify App

Sustainable living

Save water, save money and reduce your environmental impact

Automatic shut-off (for CubicSecure)

Automatically stop leaks before they cause damage

Track and reduce water usage

See daily, weekly and monthly usage in the Quandify App to reduce waste and save money
